RE: ML 50575 Building Stone Lease

Dear Mr. Haas:

By letter dated January 9, 2008 I advised that the above numbered lease terminated on December 31, 2007 and Lessee has 2 Months thereafter to remove from the leased premises all machinery, equipment, tools, buildings, and stockpiles of leased substances for which royalty has been paid. On January 31, 2008 you wrote back, requesting an extension of 60 to 90 days to perform such tasks.

Due to the inclement season the Trust Lands Administration will allow the Lessee until the end of April, 2008 to remove from the leased premises all machinery, equipment, tools, buildings, and stockpiles of leased substances for which royalty has been paid. The Trust Lands Administration will further allow the Lessee until the end of May, 2008 to complete all reclamation work to include regarding and reseeding of the disturbed lands within the leasehold.

Please work diligently to comply with the above schedule. Please remember that no further mining or quarrying of stone from the leased premises is allowed, except that lessee may remove existing stockpiles of stone product providing that royalties upon such stone are paid to the Lessor. Thank you for your cooperation.

Sincerely,

John T. Blake  
Mineral Specialist
